## **STANLEY Introduces New Line of Access Solutions with EasyPass for Mixed-Use and Light Commercial Properties**

**INDIANAPOLIS – March 28, 2017** – STANLEY, part of the dormakaba Group portfolio of mechanical and electronic access control solutions, today announces the release of a new line of access and security solutions for mixed-use and light commercial facilities. This family of new products is highlighted by EasyPass™, a leading feature that allows for more convenient, easier door access. EasyPass is a uniquely smart feature – new to any lock anywhere – that allows doors to open more easily and conveniently with less rotation of the lever.

EasyPass is designed to greatly enhance convenience in situations where accessing a lock may be difficult, such as an individual's hands may be arthritic, or full of groceries or holding a young child. The new comprehensive product line from STANLEY addresses the distinct need for innovative access solutions to secure several different types of openings for mixed-use facilities including perimeter openings, resident entrances, interior locked doors, interior passage doors, closet doors and entrances to common areas.

“Our new Multifamily line is designed to address all the needs for openings throughout any mixed-use facility,” says Charlie Smith, Director of Sales for STANLEY Multifamily. “We know that protecting the perimeter of a building is a top priority for property owners, so in developing this line of products, it was our goal to create solutions for all the different exterior openings on all the different types of mixed-use facilities.”

In addition to EasyPass, the STANLEY Multifamily product line features Grade 2 commercial deadbolts, interconnected locks, closers, exit devices, as well as Grade 2 tubular locksets with a variety of styles and functions.
