

Johnson Controls releases mask detection, intelligent person search and more in victor/ VideoEdge 5.6 update

MILWAUKEE (September 8, 2020) – [Johnson Controls](#), the global leader for smart and sustainable buildings, introduces the latest generation of the Tyco American Dynamics victor/ VideoEdge solution, which introduces powerful features such as Intelligent Person Search, Area Occupancy, new Event Management hub, 64-bit client, and NVR Network Interface Card bonding for increased bandwidth.

New victor/ VideoEdge AI features give security operations an advantage over potential threats with shortened response times and more accurate intelligent search capabilities. These AI capabilities equip customers with a comprehensive, intelligent solution for high accuracy, and far greater power, giving their business a superior advantage against potential threats.

Powerful AI and analytics are now combined and integrated with victor/ VideoEdge to strengthen operational efficiency and effectiveness. Detect suspicious objects and abnormal behavior to identify trends that help mitigate threats, and pinpoint exact location of alarms on maps to arm security teams with life-saving details. With powerful, automated and forensic search capabilities, powered by Tyco AI, victor/ VideoEdge users are able to save time when minutes matter.

All of our products are analyzed, tested and required to meet or exceed the rigorous standards of the Johnson Controls Cyber Solutions Product Security Program. This holistic approach is aimed at providing peace of mind to our customers. Our security mindset begins at initial design concept and is supported through deployment, including a rapid incident response to meet the comprehensive and evolving cybersecurity environments.
