PACOM Joins 3xLOGIC at ISC West Offering Full Menu of New Solutions Integration with 3xLOGIC VIGIL video platform leads innovations on display

WESTMINSTER, CO—05 April, 2019—[PACOM](#), which designs, develops, and manufactures industry-leading security platforms for enterprise multi-site and campus environments today announced the company's line-up of new solutions to be showcased at the upcoming ISC West tradeshow in Las Vegas, 10-12 April, 2019.

Joining together with 3xLOGIC for the first time at the 2019 show, PACOM is leading with our most recent innovation, **VIGIL Video Integration**. PACOM can now intelligently leverage the full range of VIGIL video products for the purpose of alarm verification. This offers customers the opportunity to install a completely integrated solution providing access control, intrusion detection, and video verification all in one elegant solution. This new offering is highly suitable for access control applications that require seamlessly-integrated intrusion detection and video verification. Other PACOM product highlights on display include,

[GMS Multi-Site Security Management Software](#). GMS is the perfect multi-site security management platform, providing integration between access control, intrusion, video, intercom, and virtually any building management or security solution. Designed to manage thousands of locations simultaneously through a single interface, while providing industry leading availability and redundancy. GMS meets end user demands for a multi-site security system with multiple integrations, which can be managed through a single interface simultaneously for an unlimited number of locations.

[8003 Hybrid Access and Intrusion Controller](#) is an intelligent, IP-enabled hybrid security controller designed for advanced access control and full intrusion detection. The 8003 can support up to 8 doors/16 readers and 96 supervised inputs. Combined with dual-channel reporting and distributed intelligence, it is the perfect choice for advanced access control applications requiring a full intrusion detection system.

[8603 Intelligent IP Card Reader Interface](#) is an IP-based two door controller providing unparalleled security and flexibility for access control systems. This PACOM solution meets the demand for access control applications that require IP connectivity and the use of high-security OSDP-compliant readers.

To view the full range of PACOM and 3xLOGIC solutions and to receive any one of many available product demonstrations, please visit the **3xLOGIC/PACOM booth #30064** during ISC West, April 10-12, 2019, at the Sands Expo, Las Vegas, NV. ISC West is the largest

converged security industry trade show in the US, with over 30,000 security professionals in attendance and more than 1,000 Exhibitors and Brands.
