Protos Security newest Solution Innovation Partner at the Security Executive Council

Daleville, VA June 3, 2020 – Protos Security, a nationwide leader in Security Services has been added as a Solution Innovation Partner by the Security Executive Council.

“The Security Executive Council is excited to welcome Protos Security to our Solution Innovation Partner (SIP) Program. We believe that Protos’ ability to leverage traditional security officers, armed security officers, on-demand emergency security officers, and off-duty Police Officers with technology oversight is an effective all-hazards risk mitigation solution service offering likely surely to be embraced by our community of practitioners. We look forward to driving the SIP Program’s win-win-win mission with Protos and our community” said Dean Correia Emeritus Faculty, Business Continuity Lead at Security Executive Council

The Solution Innovation Partners program is a part of the Security Executive Council’s Security 2020™ Initiative. SIP is an informed diligence process that provides end users a degree of confidence as they choose security product and service providers. Selected companies are evaluated for their risk mitigation and return on investment capabilities, as well as their trustworthiness. [Find out more about the SIP Program](#)

Protos Security is a nationwide leader in security services offering a broad portfolio of managed, direct and remote security services. Protos’ industry-leading technology puts all the information customers need to efficiently manage their security services in one place, giving them real-time visibility and control over their risk management process.
